# WILDLAND FIREFIGHTING SKID

The Canflex Wildland Firefighting Skid offers a rapid, cost-effective solution for wildfire response, transforming any available flatbed or gear truck into a fully equipped firefighting unit in minutes.

Trusted by a wide range of organizations, it delivers exceptional portability, efficiency, and low operational cost without the burden of maintaining dedicated fire trucks. When not in use for emergencies, the vehicle can continue to serve daily functions, then instantly convert for fire response when needed.

Each skid comes standard with:

- 400–1,200 gallon baffled water tank
- High-pressure fire pump & powered hose reel
- 8–16 lockable storage lockers with lighting, divided bins for PPE, foam systems, tools, hoses, and fittings (one cabinet sealed & vented for fuel)

We also offer fully customizable response packages to meet specific agency needs.
